POLICY REGARDING REFRACTION AND ROUTINE EYE EXAMS

Refraction is the process of measuring the eye’s need for glasses or other corrective lenses (also called the eye’s refractive error). **Medicare and most health insurance plans do not cover this service and therefore, the patient is responsible for this charge, in addition to any co-pays or deductibles.** The refraction can be performed during a complete exam but this portion of the exam is charged separately. If performed, our fee for the refraction is \$35. In the absence of a medical condition other than refractive error, Medicare and most health insurance plans consider an eye exam to be routine, and also not a covered service. Charges for routine eye exams are also the responsibility of the patient. **If you want an updated glasses or contact lens prescription we must have a refraction performed today.**

_____ **Yes, I wish to have a refraction performed today and understand I will owe \$35**

_____ **No, I do not want to have the refraction performed today.**

Payment and Treatment Policies

Our office files your insurance as a courtesy. Your copay and/or deductible are due at the time of your visit.

Insurance – Insurance card and driver’s license must be presented prior to each office visit in order to utilize benefits. Please notify our office if there is a change in your insurance plan or coverage. We file claims as a courtesy to our patients and are only responsible for filing claims to contracted insurance carriers. Any dispute for unpaid charges from the insurance company will be billed directly to the patient and due upon receipt of a statement from our office.

If you plan to utilize your routine benefits (VSP/EyeMed/AAFES) please notify us at the time of check in so that your claims may be processed correctly. If you fail to notify us we cannot re-file the claim at a later date.

If your insurance company requires you to have a referral for your visit you must contact your primary care doctor at least 7 days in advance of your appointment and call our office 1 day prior to your appointment to be sure we have received the necessary documentation.

Paperwork - You are required to update paperwork annually. If you have not been seen by one of our physicians within the last 6 months, or come in with a new problem, you will be asked to update your information. This allows us to keep your medical record up to date so that we may provide quality care.

Payment – Full payment is due at the time services are rendered unless other payment arrangements have been made with our billing department prior to your visit.

Medication Refills – Prescription refill requests are required to be called into your pharmacy at least 5 days prior to running out of your medication to allow adequate time for approval. Refills will only be handled during normal business hours Monday through Friday. Please contact your pharmacy for refill requests.

Appointment Reminders – You will receive a reminder call/text from our office 2 days prior to your scheduled appointment and an email confirmation one week prior if your email is on file. Please confirm your appointment with this system if you are able to do so.

After Hours – Our phone message will provide you with instructions to reach the physician on call. This service is to be utilized in emergency situations only. Refill requests or routine requests for appointments will not be returned until the next business day by a staff member.

NSF Checks – A \$25 fee will be added to your account for all returned checks.

Minor Patients - For all services rendered to patients age 17 or younger we will look to the adult accompanying the patient for payment. All minors must have written consent from the parent/guardian in order for us to provide treatment.

Thank you for your business and we look forward to providing you quality eye care.
